- Spain

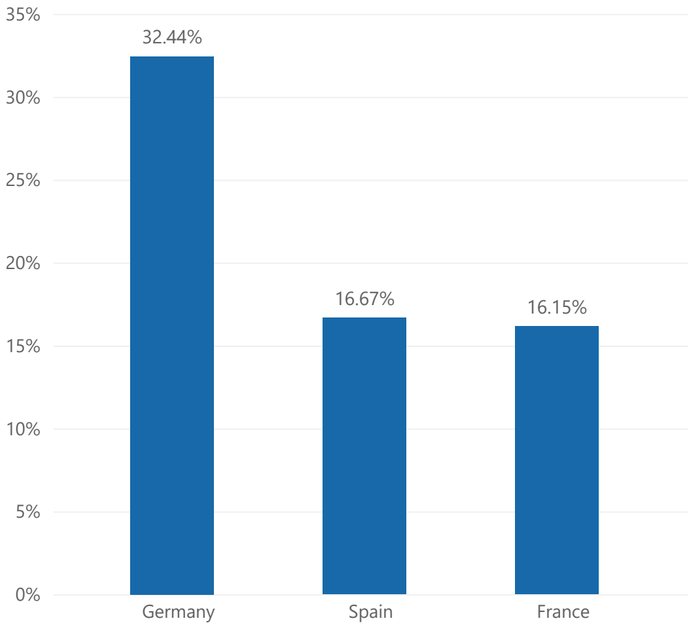

Churned vs Retained

Total Customers by Churn Status

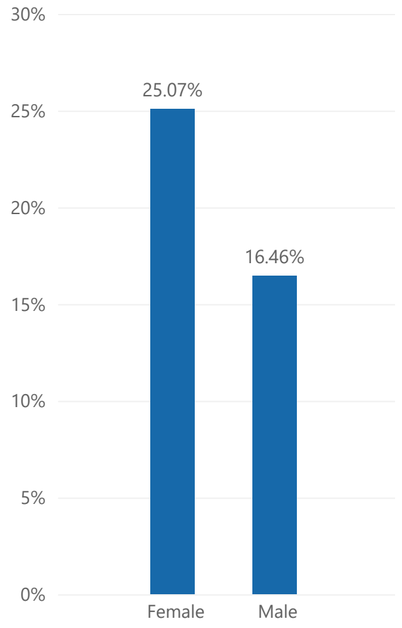

Germany churns at twice the rate

Churn Rate by country

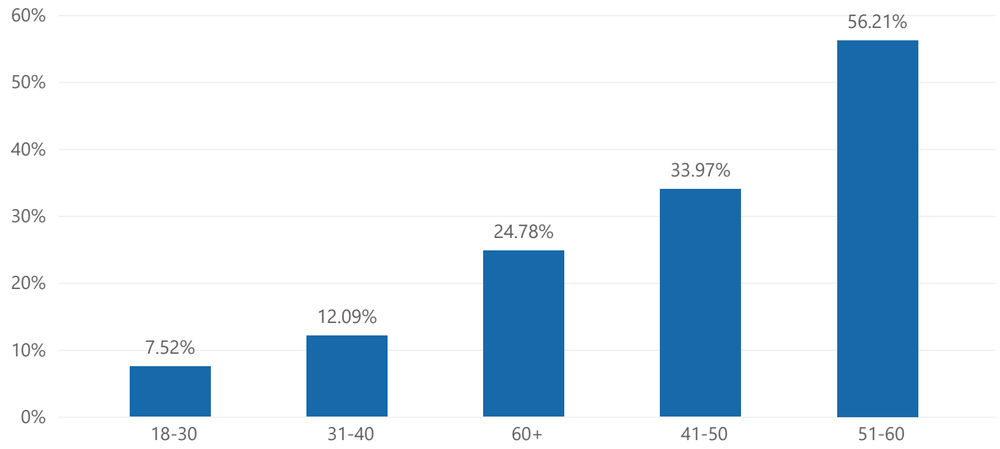

Churn Rate by gender

Women churn more than men

Gender

Churn rises sharply after age 40

Churn Drivers and Action

Why are customers leaving, and who should we contact first?

Country x Activity

country	Active	Inactive	**Total**
France	11.50%	21.13%	**16.15%**
Germany	23.72%	41.08%	**32.44%**
Spain	10.75%	23.35%	**16.67%**
Total	**14.27%**	**26.85%**	**20.37%**

High Risk Not Yet Churned

Balance At Risk

75.80M

Target inactive customers aged 41-60 in Germany
This segment churns at about 64%, against 18% for everyone else. Offer a retention program and personal outreach.

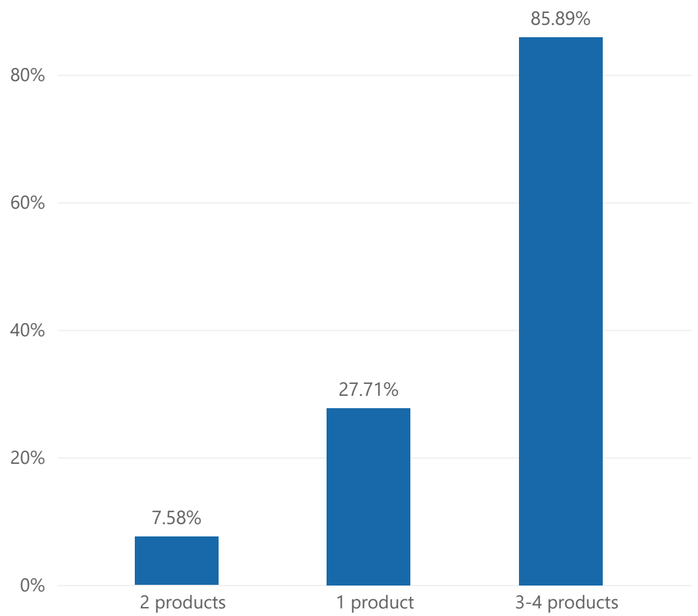

Investigate customers with 3 or more products
They churn at 83% to 100%, while customers with 2 products churn at only 7.6%. Check whether bundling or service issues are the cause.

Re-engage inactive members
They churn at 27%, almost twice the rate of active members (14%). Use offers, reminders and app engagement

Use the priority call list
Contact the high-balance customers the model flags as High risk before they leave.

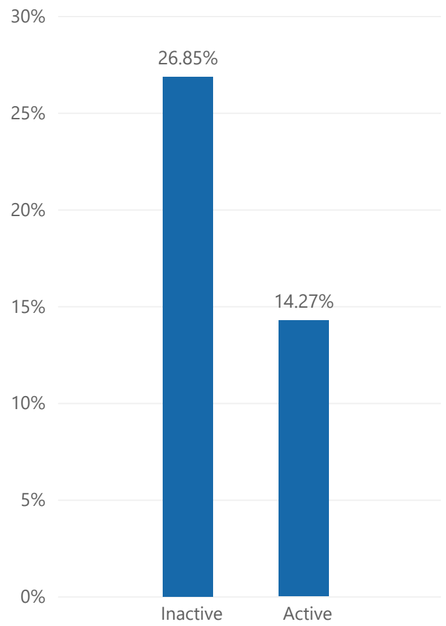

2-product customers are the safest

Churn Rate by Product Group

Churn Rate by Activity Status

Inactive members churn almost twice as much
